Assunto: Translate and validate your scale

Dear Sir Link and yours collaborators,

I'm a student of Psychology Course and I'm doing a Masters in Clinical Psychology at the Institute Miguel Torga in Coimbra (Portugal), and I intend to accomplish a master' thesis on the perceived stigma in patients with schizophrenia. I know some of your work and yours collaborators, which I admire a lot and I think them very interesting as it is a part of what I'm interested enough. For such, I wonder if it has authorized the translation and adaptation of your Perceived Devaluation and Discrimination Scale for the Portuguese population. If you have not yet requested, I would like to ask permission to translate and validate your scale.

Yours Faithfully,

Sílvia Duarte

Hi Silvia,

Here are articles that have items – use the version in the word document – scoring is sufficiently explained in the articles. Good luck! Bruce
